Disclaimer: Times and fee changes for tourist attractions fairly often, so always check before you arrive. Also, the GPS coordinates are from Google Maps and I tried to get as close as I could to the exact spot I was standing where I took the shots you see in the thumbnails, but I can't guarantee they are spot-on, but they should be pretty darn close. Also, although I made this PDF to help you along your way, if you get lost, fall in the Tiber river, get a taxi-driver that charges you way too much, or any of the million things that might happen in Rome, you're pretty much on your own, so don't hold me or the US Government or even Google responsible. Just sayin. Be careful out there (and keep an eye out for pickpockets).
